The payment yesterday by the Subtreasury of \$2,000,000 on account of Australian gold at San Francisco was supplemented today by the payment of \$70,000 additional on the same account. An incoming steamship also brought another million dollars' worth of gold to the South African consignment secured by the National City Bank. The Subtreasury has contributed a small sum to the money market during the week on regular operations. Acting Sec'y H. M. HNOX, Title Officer MATTHEW P. MURRAY,

Subtreasury has contributed a small sum to the money market during the week on regular operations.

It appears, therefore, that the banks have gained gold to the extent of about \$5.00,000 to offset the shipments to the interior. It was the knowledge of this condition that caused the hopes of casier money. But while no liquidation was forced by calling of loans, the banks still refrained from extending loans on the Stock Exchange.

Late in the day call loans mounted again to 15 per cent. Itates for time loans for thirty days to six months are still held in the neighborhood of 8 to 8 per cent for the various periods, thus showing the conviction that money will continue scarce well into the coming year. Sterling exchange steadied again to-day, and intimations came from London that the Riank of England is preparing to borrow morey from the market in order to check the downward course of discount rates and prevent possible gold exports.

The weekly statement shows that the LAND TITLES CERTIFIED AND Opte & Sargent, Merchants, L. S. PARKER, President Parker Shire Company, Jefferson

discount rates and prevent possible gold exports.

The weekly statement shows that the English institution had lost \$5,521,685 in gold. The Bank of France in the same time lost \$2,500,000 in gold. The New York exchange at Chicago dropped to-day to \$5,500c discount, compared with 10 cents discount yesterday, thus indicating pretty clearly the direction which will be taken by the first money that can be spared by the New York banks. The stimulating influence of the hope of easter money was also counteracted in this way, beiping to the irregular tone of the late market.

Bonds became irregular in sympathy with stocks. Total sales, par value, £2,725,600. United States bonds were all unchanged en the last call.

The favorable outlook for easier money and the strong current belief that the coal strike was on the eve of a settlement were the motives of the buying, which showed the motives of the buying which showed some urgency in the case of some af the casiers. The obvious fact that earnest consultations were going on and every effort was being made to bring powerful influence to bear to effect a settlement of the strike gave color to the belief and gave rise to countless rumors, none of which could be The Metal Markets.

The Obvious fact that earnest consultations were going on and every effort was being made to bring powerful influences to bear to effect a settlement of the strike gave color to the belief and gave rise to countless rumors, none of which could be authenticated.

The favorite story this morning was that J. P. Morgan had asserted his authority in favor of a compromise with the strikers.
